

# ApeosPort/DocuCentre Product Package Aware Print Driver Installation Guide (Windows® OS)

**NOTE**: Standard printer setup and custom printer setup are two methods of installing the print driver. The following describes how to install the print driver with standard printer setup when the machine is connected to the subnet using TCP / IP as the same as the computer.

#### Setting Procedure:

- I. [Machine] Checking the machine's model name
- II. [Machine] Checking the Machine's IP Address
- III. [PC] Downloading the Print Driver
- IV. [PC] Installing the Print Driver
- V. [PC] Sending a Print Job from the Computer

**NOTE**: You need to operate with both your computer and the machine. [PC] indicates the operation with your computer, and [Machine] indicates the operation with the machine. Change the security settings to configure the following procedure. Make the settings according to the security rules you are using.

#### I. [Machine] Checking the Machine's model name

1. The machine's model name is displayed in front side of the Control Panel.

### II. [Machine] Checking the Machine's IP Address

1. Press the <Machine Status> button.

Log In / Out Job Status	Machine Status Power Saver	
ABC DEF (1) (2) (3) GHI JKL MNO (4) (5) (6) PNRS TUV WV7	Clear All	
Tot         Mark           T         8         9           Image: Second Dial         Image: Second Dial		
	Start Data ♦ Error ! Main Power@	

2. Check the machine's IP address on the 'Machine Information' screen.

Machine Information	Faults	Supplies	Billing Information	Close
General Informa Website:	ition		Machine Configuration NC100420	Print Reports
Call your local Se	rvice Representat	ive.	Software Version	Hard Disk Standby
Machine Serial N	lumber		Paper Tray Status	Print Mode
Current System : I I I I IP Address	Software		Fax Certificate Number	Fax Receiving Mode Auto Receive

**IMPORTANT:** When an IPv6 address is specified, IPv4 address is not displayed. Select [System Settings] > [Connectivity & Network Setup] > [Protocol Settings] > [TCP / IP – Network Settings], and then select [Change Settings]. Refer to [IPv4 – IP Address].

3. Select [Close].

#### III. [PC] Downloading the Print Driver

NOTE: You can get the print driver by either of the following two methods.

- Install from the media (software, product manual) provided with the machine.
- Download from our official website. (http://www.fujixerox.co.kr)

#### IV. [PC] Installing the Print Driver

- 1. Double-click the downloaded PCL print driver.
- 2. Confirm the software license agreement, and click [Yes].
